INTRODUCING GROHE KITCHEN SINKS

Add up how much time you spend at your kitchen sink. Filling pots, preparing veg, washing up after a big meal. It's a place you will stop at countless times each day, so why not choose a sink that exceeds your needs in terms of quality, design and features?

GROHE sinks have been designed to fit every type of kitchen scheme, with a range of innovative, modern designs perfect for your space. You can choose between a sleek, hardwearing stainless steel model or a super-durable composite available in two contemporary colors. You will find compact models with integrated drainers, large double sinks for when you need to spread out, and chic built-in sinks that fit flush to your worktop. With features like the GROHE QuickFix system and reversible designs as standard, you can have your new GROHE sink installed in minutes with no fuss or hassle.

We are also confident that you will love the special features on offer, like the automatic waste that means never plunging your hand into dirty water again. Thanks to GROHE Whisper technology you can even be sure that this will be your quietest sink ever – for composite sinks the material itself reduces the noise from water flow and for GROHE stainless steel sinks special integrated insulation achieves the same effect. With a sink from GROHE you'll notice the difference, making every time you use your sink less of a chore.

FEEL THE BENEFITS INNOVATIVE FEATURES AND FUNCTIONS

We can't claim to make washing up a joy, but thanks to the smart, useful features of every GROHE sink, we certainly believe that we can make your sink somewhere you are happy to spend some time. With a GROHE sink, cleaning is easier, draining the bowl can be done remotely, and even the sound of the water running is minimized. Just select your ideal size and style – installation is effortless and the benefits speak for themselves.

Spacious bowls

Thanks to our innovative manufacturing techniques, all GROHE sinks feature bowls with a generous depth of min. 16 cm, maximizing space for washing large pots with ease.

Pre-punched faucet holes

The most GROHE sinks come with two pre-punched faucet holes, meaning no additional tools are required and many sinks are reversible and can be installed as either left- or right-handed option.

Overflow

The overflow, available on all GROHE sinks, avoids any spillage of water in case the faucets are inadvertently left open. The perimetric solution available on some models improves the look, thanks to its squared-out and essential shape.

Waste fitting with remote control

GROHE sinks are equipped with a 3.5" waste fitting and practical strainer plug that prevents solids and leftovers from flowing away with the waste water. The steel cap available on some models adds elegance to the bowl and hides any residue collected in the underlying basket.

Siphon included

For a quick and hassle-free installation each sink comes with an under-sink siphon complementing the scope of delivery and guaranteeing an ALL IN ONE solution.

Water drainage

Drainage from the bowl's base and drainers is an important feature, always well cared for on GROHE sinks. In the squared-out, flat-bottomed sinks, good drainage is ensured by the elegant diamond-shaped creases that make the water flow away more easily.

QUALITY THAT LASTS A LIFETIME

GROHE's reputation for quality of course extends to every sink in our range. With steel thicknesses ranging from 0.6 mm on the entry price segment to 1 mm on the premium ranges, each stainless steel sink uses steel above industry standards, and our patented brushing process creates a super-smooth surface that is easy to clean. Our composite sinks produced in a special computercontrolled casting process use 76 % quartz mixed with acrylic resin for a super hardwearing and minimum 7 mm thick material offering superlative durability and function, with smooth pore-free surface that is resistant to heat, dents scratches and stains, hygienic and easy to clean. For additional reassurance, each GROHE sink comes with a five year warranty, just like our faucets.

STAINLESS STEEL SINKS

PRODUCT FEATURES, FINISHES AND MOUNTING TYPES

Whatever the design of your kitchen you will find a GROHE sink that complements it beautifully. The range includes standard built-in models, flush-mounted, under-mounted and flat-edge models, with eight different designs, from timeless to crisply minimal.

You can choose from two different stainless steel grades – AISI 304 and AISI 316 – according to your specifications too, so whether you are kitting out a compact kitchen or looking for a centrepiece sink for your island unit GROHE has a model that is just right, and at a price point that suits.

GROHE StarLight

All GROHE sinks use stainless steel graded above the industry average, so you can be confident of their quality and durability. Our innovative brushing technique means that the sparkling steel surface is ultra smooth for easier cleaning.

GROHE QuickFix

Install your sink swiftly and easily thanks to the GROHE QuickFix system (kit supplied). With two pre-punched faucet holes most of our sinks are easily reversible, giving you the flexibility you need for any design scheme.

GROHE Whisper

Shhh! A special insulation on the underside of the sink means that noise from running water and handling pots and pans is reduced to a minimum.

AISI 304

On every sink model GROHE uses AISI 304 stainless steel, exceeding the quality standard of the industry. Thanks to the high percentages of chrome and nickel it contains, AISI 304 steel gives a particularly bright finish and makes the products durable against rust and corrosion.

AISI 316 (MARINE STEEL)

With AISI 316 available on the K400+ series, GROHE offers a durable solution even for regions with salty, rust-causing climates. Also known as the "marine steel", AISI 316 is mainly used in the shipbuilding or chemical industries as it is famous for its high percentages of chrome, nickel and molybdenum which make the steel extremely resistant to rust and corrosion and even acids or chlorine.

PATENTED BRUSHING TECHNIQUE (GROHE SATIN FINISH)

The K300 – K1000 series are treated with special vegetable fibres (Tampico) that give the sinks their characteristic extra-fine satin finish that is highly elegant and functional. GROHE's patented brushing technique creates a stainless steel surface that is smoother and less porous than many other brands, making cleaning your sink easier and significantly enhancing its durability.

**SPACIOUS BOWLS**

Thanks to our innovative manufacturing techniques, all GROHE sinks feature bowls with a generous depth of 16 cm, maximizing space for washing large pots with ease.

**WASTE FITTING WITH REMOTE CONTROL**

Supplied with each model, the remote control fitting allows you to empty the sink without reaching into the dirty water – clean and convenient.

**STANDARD BUILT-IN**

Traditional built-in with a vertical 8mm edge.

**FLAT-EDGE**

An original edge with an inclined 3mm high profile, matching an extreme elegance with ease of installation.

**UNDERMOUNT**

Sleek and contemporary, ideal for installation under the worktop.

**FLUSH-MOUNT**

The product is sunk with a 1.5 mm deep recess making it perfectly flush with the worktop. Alternatively, it can also be installed on the worktop.

MANUFACTURING PROCESS

GROHE's collection of sinks covers every base, from entry-level models to sophisticated, minimalist designs. The way your sink is made will affect how durable, spacious and sleek it looks. Here are the three manufacturing types we use:

MOULDED SINKS

Each sink is moulded from a single sheet of high-quality stainless steel, using a press mould. Faucet and waste holes are punched afterwards. This method creates sturdy sinks in even complex shapes, meaning a sink that is both durable and affordable.

MOULDED-WELDED SINKS

The sink's frame and bowl are press moulded in high-quality stainless steel before being welded together. This process allows for deeper bowls, more vertical walls inside and a slimmer radius between bowl and frame, for a sleek, modern look.

BENDED-WELDED SINKS

High-quality steel is laser cut to measure before being bent into the bowl shape. This bowl is then welded to the sink's frame. This method allows for crisper internal angles in the bowl with a very narrow radius – ideal for minimal sink designs. As there is no mould, the steel stays smoother and retains its original thickness, even at the bottom of the bowl.

PRODUCT LINES

Customize your kitchen space by choosing the perfect GROHE sink for you. Within our K-series, we offer you eight beautifully designed and durable product lines including 1, 1.5 or 2 bowl options. Various mounting types from built-in to undermount are available for your individual taste.

GROHE PVD UNRIVALLED, HARD AND SCRATCH RESISTANT

OUR HIGH-END PVD TECHNOLOGY BRINGS OUR NEW COLORS TO LIFE

When it comes to a good design strategy, the choice of colors plays a vital part. But not only the color, the quality of the finish is equally important. Especially in the world of bathroom and kitchen solutions and where surfaces ought to last for a long time, excellent, highly resistant finishes distinguish good products from great ones. GROHE's aspiration to always produce only the best drove us to choose a special technology that assures, not simply the best, most brilliant colors, but a durable coating of the highest quality. Our aim: to offer our consumers long-lasting water enjoyment. Next to the resistance of the material, it was also about the look of the color itself: we wanted to make Brushed Hard Graphite as dark grey as possible and give our golden finishes the brilliance they deserve. That was the task for our technology team. In close collaboration with the GROHE design team, they achieved exceptional results working with a great new technology: PVD.

GROHE PVD

FIND THE PERFECT MATCH SINK AND FAUCET IN PERFECT HARMONY

Everything about the GROHE range of sinks has been designed for a perfect fit – with your faucet, with your kitchen, with your lifestyle. All of the sinks have been designed to be paired effortlessly with our kitchen faucets and watersystems, both in terms of design and practicality, with comfortable proportions and no splashing. To make it even easier to pick the right sink

and faucet for you, we've also created four pre-packed sink and faucet bundles, so you can buy your ideal sink and faucet together, hassle-free. Encompassing our most popular lines, you can select a Bau, Eurosmart, Concetto or Minta sink bundle, making design, purchase and installation an even smoother, swifter process.

COMPOSITE SINKS

PRODUCT FEATURES, FINISHES AND MOUNTING TYPES

Customize your kitchen space by choosing the ideal GROHE sink for you. Our K-series range of composite sinks covers every size, configuration and price point, so you're sure to find your perfect fit. The range includes round and square models in two different colors – Granite Black and Granite Grey. Select from 1, 1.5 or 2

bowl models, with or without a drainer, with dimensions suited to kitchens from the spacious to the compact. Plus choose between a neat top-mounted model or a sleek, minimalist under-mounted version which sits under the worktop.

GROHE QuickFix
Install your sink swiftly and easily thanks to the GROHE QuickFix system (kit supplied). With pre-punched faucet holes most of our sinks are easily reversible, giving you the flexibility you need for any design scheme.

GROHE Whisper
Shhh! GROHE sinks reduce noise from running water and handling pots to a minimum, thanks to the dense mix of quartz and acrylic in our composite sinks.

QUARTZ COMPOSITE

Your sink can cope with the daily demands of even the busiest kitchen thanks to our innovative composite material. Using 76 % quartz – the hardest part of granite – mixed with acrylic resin, GROHE composite sinks are the toughest around. This hardened composite material is resistant to scratches, dents, stains, cracks and heat up to 280 °C. The smooth surface is easy to clean and 100 % food safe for total peace of mind.

Each GROHE composite sink is produced using a computerized polymerization casting process which guarantees a seamless finish and total uniformity of color throughout. What's more, the composite won't fade in UV light, meaning its certain to stay looking as good as the day you bought it.

AT0 | Granite Grey

AP0 | Granite Black

EASY TO CLEAN

Your composite sinks is easy to keep clean so you will be able to enjoy its flawless finish for years to come.

NON FADING IN UV-LIGHT

Let the sunshine in! Our composite material won't fade in UV light, keeping your sink looking pristine and the color-true.

SCRATCH-PROOF

Putting practicality first – made only from solid composite, these sinks are scratch-proof for a longer life.

HEAT RESISTANT UP TO 280 °C

Never hesitate to put down a hot pot again – GROHE composite sinks are heat resistant up to 280 °C for great durability.

SPACIOUS BOWLS

All GROHE composite sinks feature seamless bowls with a generous depth of at least 20 cm maximizing space for washing large pots and filling vases with ease.

WASTE FITTING FOR EASY HANDLING

Thanks to the automatic waste your hands will stay clean and dry. For even more convenience, upgrade your sink with the stylish push-excenter (see pages 86/87).

STAIN RESISTANT

Because your sink has to be practical as well as beautiful, GROHE composite sinks are stain resistant for long-lasting good looks.

100 % FOOD SAFE

Enjoy total confidence in using your kitchen your way – GROHE composite sinks are 100 % food safe, making prep easy and hygienic.

TOPMOUNT

A traditional built-in look with a vertical 8 mm edge. Installation is with clips (except for models 31 653, 31 654, 31 655 and 31 648 – silicone only).

UNDERMOUNT

Installed under the worktop for a sleek, contemporary look.

MANUFACTURING PROCESS

GROHE's collection of sinks covers every base, from entry-level models to sophisticated, minimalist designs. Across the whole range the innovative manufacturing process works hand-in-hand with the durable quartz composite to create sinks that are tough and durable.

Each sink is produced using a computer controlled polymerization casting process which gives complete uniformity of color and a seamless, hardened, coating-free finish. The molding process means all sinks offer a generous minimum depth of 20 cm, and thanks to the dense composite you'll also find GROHE sinks to be significantly quieter than stainless steel models.

PRODUCT LINES

An option for every kitchen – our composite sink ranges cover every style, size and price point so you're sure to find your perfect model. The composite sinks come as round and square models and in two contemporary colors – Granite Black and Granite Grey. Select from 1, 1.5 or 2 bowl models, with or without a drainer and either as neat top-mounted version or a sleek minimalist under-mounted. The choice really is all yours.

FIND THE PERFECT MATCH SINK AND FAUCET IN PERFECT HARMONY

Everything about the GROHE range of sinks has been designed for a perfect fit – with your faucet, with your kitchen, with your lifestyle. All of the sinks have been designed to be paired effortlessly with our kitchen faucets and watersystems, both in

terms of design and practicality, with comfortable proportions and no splashing. The sinks are available in two colors, both perfectly matched to new GROHE Color options for brassware, which includes Hard Graphite and Warm Sunset color options.
