SAFE, FAST AND EFFICIENT GROHE THERMOSTATS DELIVER

We've all been there before. You've just stepped into the shower when someone else in the house either turns on a faucet or flushes the toilet; suddenly the temperature of your shower plummets or becomes scalding hot – leaving you with soap in your eyes as you try to manually adjust the temperature back to a comfortable level. Install a GROHE thermostat and you can be sure of a safe and enjoyable showering experience every time.

What's inside?

Thermostatic valves work by constantly mixing hot and cold water to a pre-selected temperature. Even if there is a change in the water supply, the thermostat reacts by rebalancing the quantities of hot and cold water to maintain the correct temperature. In the most extreme cases, i.e. should the cold water supply fail, the hot water shuts off automatically to prevent scalding.

Style choices

GROHE offers concealed and surface-mounted thermostats. With concealed models, the valve is installed behind the wall for a modern look. With surface-mounted thermostats, all the pipe work is behind the wall.

User-friendly features

Our thermostats also feature a SafeStop button, to prevent children from turning up the temperature and scalding themselves, and an EcoButton to reduce water usage by up to 50%. Our EasyLogic controls are intuitive to use and cater to the entire family, whatever their height is, while the AquaDimmer allows you to turn the water on and off, adjust the flow rate and divert between two water outlets.

GROHE thermostats are the proven winners

LGA QualiTest GmbH, a subsidiary of TÜV Rheinland, carried out a major product test in 2006 that compared 17 thermostats from leading European manufacturers. In all classes our Grohtherm 3000, 2000 and 1000 thermostats achieved 1st place. Thanks to GROHE TurboStat® and GROHE CoolTouch® technologies, our Grohtherm 3000 won best product– achieving the top position in all four test categories.

GROHE's quick guide to thermostat technology.

What is a thermostat?

A thermostat maintains an exact water temperature of your choice, even when water is used elsewhere at home.

How does it work?

The thermostatic mixer valve mixes the hot and cold water and reacts instantly to any changes in the supplies, ensuring the temperature is maintained to within + or – one degree.

What are the benefits?

The pre-set temperature is reached within a fraction of a second and remains constant so there's no risk of scalding.

Are there different types available?

Yes, GROHE offers many different models to suit every style of bathroom.

GROHE TURBOSTAT®

Always the right temperature, for utmost convenience and safety.

Our revolutionary GROHE TurboStat® technology delivers water at your desired temperature within a fraction of a second and keeps it constant for the duration of your shower. Grotherm thermostats are equipped with the most advanced and precision-made cartridges in the industry. By increasing the sensitivity of the thermo-element, our thermostats react to changes in water pressure twice as fast as before.

So, no more time and water wasted fiddling with the controls to get the temperature right.

Compensating precisely for fluctuations in temperature and pressure results in a consistent and comfortable shower throughout.

The GROHE TurboStat® thermo-element at the heart of GROHE thermostats.

Exceptionally swift reaction to water-pressure fluctuations.

GROHE COOLTOUCH®

No scalding on hot surfaces thanks to 100% GROHE CoolTouch®

The GROHE CoolTouch® technology ensures that the entire outer surface never exceeds your preferred shower temperature. By designing our thermostats to include an innovative cooling channel, we have created a barrier between the hot water and the chrome surface - so it's never too hot to handle.

This safety measure is especially useful for children, who can not always judge whether something they touch is dangerously hot.

Safety surround = 100% GROHE CoolTouch®

Safety housing with water cooling

Now there's no risk of scalding yourself – or your children. The Grotherm 2000 and Grotherm 3000 thermostats offer all-round protection, as even the wall couplings are shrouded in the clever protective housing – 100% GROHE CoolTouch®.

GROHTHERM THERMOSTATS – PERFORMANCE AT A GLANCE

Find your perfect match with a Grotherm thermostat. From the pure, cylindrical form of our Grotherm 3000 Cosmopolitan to the entry-level Grotherm 1000, the range offers a choice of designs to meet all of your requirements.

GROHE TurboStat® technology guarantees a steady stream of comfortably hot water. Any fluctuations in the water temperature or pressure are compensated within a fraction of a second, leaving you to enjoy your shower at the temperature of your choice.

And there's no chance of burning your fingers on a hot chrome surface, thanks to GROHE CoolTouch® technology. For added comfort and safety, our Grotherm 3000 Cosmopolitan and 2000 thermostats feature a sophisticated water-cooling system, to ensure the surface of the thermostats is never too hot to touch.

Thanks to their fast temperature finding and split-second response time, all GROHE thermostats can help you save water and energy and can be found within the GROHE EcoJoy™ collection of resource-efficient products. Furthermore, our deep chrome finish, GROHE StarLight®, resists tarnishing to ensure a luminous shine for years to come.

GROHTHERM 3000 COSMOPOLITAN

Grotherm 3000 Cosmopolitan thermostats combine modern, minimalist design with our award-winning thermostatic technology for relaxing shower enjoyment. Based on a simple aesthetic philosophy of extruding cylinders in perfect proportions to create balance and harmony, the pure design is enhanced by GROHE StarLight® chrome – a deep, luxurious finish, which resists soiling and tarnishing.

GROHE TurboStat® responds rapidly to any fluctuations in pressure – maintaining your perfect water temperature, while GROHE CoolTouch® ensures the surface temperature of the thermostat never exceeds the temperature of the shower water – eliminating the risk of scalding from hot chrome surfaces. For a water-efficient bathroom, the EcoButton on the handle enables you to reduce your water consumption by 50%.

The range of exposed and concealed models complements GROHE Cosmopolitan collections – enabling effortless design coordination in the bathroom.

GROHTHERM 2000 NEW TECHNOLOGY YOU CAN TRUST

THE HISTORY - EXPERIENCE AND INNOVATION

The thermostat is a vital piece of bathroom technology that mixes cold and hot water to create the desired temperature for the bath or shower. GROHE, which first began to engineer thermostats in the 1950s, has a well-earned reputation for manufacturing the most efficient products on the market.

GROHE has now sold more than 30 million thermostats and continually uses its long and valuable experience to innovate and improve their performance. Grohtherm 2000 New is the latest – and the best – model designed and Engineered in Germany and produced in GROHE's awarded factory in Hemer, Germany.

GROHE RAPIDO CONCEALED SHOWER CONTROLS

Concealed bath and shower faucets lend a clean, modern look to a bathroom – where only the essential elements are on show. With its shallow installation depth and choice of single lever or thermostatic operation, Rapido is a universal solution that enables you to create your perfect shower. Once installed, the concealed body is completed with a faucet trim set. Available in a wide range of designs to match our faucet and shower collections, the trim set can be chosen at a later stage as all designs are compatible with the concealed body.

THE INNOVATIVE CONCEALED SOLUTION FROM GROHE. GROHE RAPIDO

Ultra flat design, only 70 mm installation depth

Whether you're renovating an existing bathroom or creating a new one, Rapido is the perfect solution for concealed bath and shower faucets. Rapido is the ultra-flat concealed solution from GROHE. With only 70 mm installation depth it will fit into any wall. Where space is limited, Rapido is the solution.

Fast and safe installation

With Rapido, you're always on the safe side. The concealed box and faucet body comes as a complete ready-to-install unit with coded water inlet and outlet connections. So there's no chance of it being installed incorrectly. The unit is 100% tested before it leaves our factory to ensure a lifetime of perfect and safe operation.

Numerous possibilities for maximum comfort

Whether you choose a thermostat with GROHE TurboStat® or a single-lever mixer with GROHE SilkMove®, you can always rely on GROHE quality. GROHE Rapido E features our advanced GROHE SilkMove® technology, for a lifetime of smooth handling. For maximum showering enjoyment, GROHE Rapido T benefits from GROHE TurboStat® technology – for safety, comfort and water efficiency. Thanks to an excellent flow rate of over 50 litres per minute* and a third outlet, Rapido T is also the perfect choice for a custom shower where you wish to install a head shower, hand shower and side showers.

* at a flow pressure of 3 bars and without downstream resistance

GROHE RAPIDO T

For a thermostatically-controlled bath or shower choose Rapido T featuring our renowned GROHE TurboStat® technology, the mixer ensures safety and comfort for the duration of your shower. It responds rapidly to any fluctuations in the water supply so there's no risk of scalding, while a SafeStop button, set at 38° Celsius, prevents the temperature from accidentally being raised above this level – perfect for households with children. GROHE Rapido T may be used as a shower, tub or central thermostat and has a flow rate of over 50 litres per minute*. It can supply water to up to three outlets enabling you to create your luxurious showering environment.

* at a flow pressure of 3 bars and without downstream resistance
